PRICE'S LAWN GRASS

Our mixture is especially prepared from the highest quality seeds that can be produced. It makes a smooth, green, velvety lawn with a thick bottom, free from clumps. Only the very best fine-leaved and deep-rooted varieties of the most suitable grasses for making an even, thick mass of sod are used in this mixture. Sure to produce the best results under average conditions of soil and climate.

Price's Seeds

1952

Every successful market grower realizes the tremendous importance quality seeds play in the production of profitable crops. The market gardener who makes his livelihood from the sale of the produce grown cannot afford to sow seeds of doubtful value. He must have highly bred strains carefully selected from vigorous parent plants that show all the typical characteristics of the true variety. They must be full of vigor and vitality to make a sturdy growth from the start. More than three generations of market growers have realized that they can depend on PRICE'S to supply them with the finest in Vegetable Seeds.

Our list of varieties includes the choicest strains of all the best standard sorts but we recommend making thorough trials of our many new varieties because they have proved superior in many sections. Higher yields, better quality, and disease resistance are important factors that distinguish many of the newer varieties.

Fertilizers and Plant Foods

WIZARD BRAND Pulverized Sheep Manure

All-Purpose Fertilizer—for Lawns, Trees, Shrubs and Flowers

Nothing can equal this for lawns, plants, and gardens, as it is the strongest of all natural manures, chemical analysis showing it to contain a higher percent of fertilizing ingredients—ammonia, phosphoric acid, and potash—than in any animal fertilizer in use. It is sterilized to kill all foul seeds and ground fine. It is clean, easily and quickly applied, has no unpleasant odor, will not kill or burn the grass like the commercial fertilizers, will not sow a crop of noxious weeds for you like barnyard or stable manure to fill your lawns. It is immediate in its effect and lasting.

Cow Manure (Pulverized). Thoroughly sterilized and weedless. Quick in action and especially desirable for pot plants, etc.

Cow Manure (Shredded). One sack of this is equal to one cartload of cow manure in regular form. Convenient to handle, making it possible for everyone to get this usually scarce article at all times. Especially suited for soil-mixing, mulching, and liquid manuring.

Bone Meal. Unusually rich in nitrogen and phosphoric acid, the two principal plant foods. We recommend this especially for lawns, gardens and greenhouses, or any purpose where a high class fertilizer counts.

Nitrate of Soda. Nitrogen in immediately available form for Lettuce and other leafy vegetables. Use 1 ounce to a gallon of water as liquid or 1½ ounces to a square yard dry.

Peat. Finely ground peat, very desirable for adding as a top dressing to the lawn or for spading into the soil for the garden or when making a new lawn. Also excellent for the Rose bed, and for use as a mulch. One bale will top dress 800 to 1000 sq. ft., ½ in. deep.

Humus. A soil-ingredient, improving its texture and water-holding properties. 100 lbs. will cover 80 sq. ft. 1 in. deep.

Lime, Agricultural Hydrated. Sweetens sour soils; binds loose soils; breaks up clay. Use 50-lb. sack to a plot 30x40 ft.

Hyponex Plant Food. For growing plants in sand, soil or water. One teaspoonful will make a gallon of complete plant food. 1 lb. will make 100 gallons.

VIGORO

Vigoro is easy to use. Results are so amazing. Clean and odorless. Vigoro contains all eleven of the vital food elements plants require from the soil. Vigoro is most economical to use.

Armour's Fertilizer (Special). 5-10-5.

Aluminum Sulphate. A material used in creating acid soils in which Azaleas, Rhododendrons, and similar plants are to be grown. Use 1 lb. to 10 sq. ft. of surface.

Blood, Dried. For top-dressing, for mixing with the soil, and for applying in liquid form, it is one of the best and safest nitrogenous fertilizers. It is splendid for Roses, Carnations, Chrysanthemums and all kinds of pot plants.

Rose Food. Following careful experiments we are prepared to supply a special food that will aid your Roses toward unusual vigor and freedom of bloom. Rose Food is a carefully balanced fertilizer prepared with a bonemeal base. Other organic as well as mineral elements have been added.
